I'm extremely pleased to report that soon we will add six new badges to our FRA Badge Program! My sincere thanks to the AFMS Board for approving the funding necessary in the coming year’s budget to make this happen and continuing to provide their unqualified support.

Prior to the AFMS meeting in Roswell, I had already taken the following steps: 1) outlining 13 possible new badges and activity sets in my monthly AFMS newsletter column over the course of the past couple years; 2) polling youth directors at local clubs that have been using the program most actively to see which of the new badges they’d prefer; and 3) getting a cost estimate from our badge manufacturer to present to the AFMS Board. In my poll of local youth leaders, most voted to add the following: Earth Processes, Gold Panning & Prospecting, Earth in Space, Gemstone Lore & Legend, Rocking on the Computer, and Stone Tools & Art. Their input and thoughtful suggestions are all greatly appreciated, and it’s a direct result of earlier suggestions by youth leaders that activities such as gold panning and stone tools were developed.

In the time since the AFMS meetings in June, I’ve been working at developing and fleshing out the activities for our 6 new badges, with about 5 to 7 possible activities for kids to choose from for each. And I’ve been sketching out possible badge designs, which I’ll be submitting to our manufacturer for further refinement. Finally, I’m revisiting our current set of 9 badges to make revisions, updates, and additions to the activities we already offer. I’ve been slowed by a little oral surgery (ouch) but hope to have everything pulled together and finalized this fall toward a goal of having a totally revised badge manual posted to the AFMS web site with the arrival of 2008, when I hope youth leaders can begin utilizing our new offerings on a total of 15 topics.

In addition to my thanks to the AFMS for approving funding, I offer continuing thanks to local youth leaders who have taken up the badge program with their kids. I view my role as a facilitator: trying to come up with activities that may be of value. But their real value isn’t realized until a local leader at a local club gathers together a group of kids, rolls up his or her sleeves, and makes something happen in ways that are always unexpected, interesting, and, hopefully, fun! That’s where the real work begins and ends, so let’s all give thanks and support to our local youth leaders for inspiring and developing the next generation of rockhounds.

Please help the effort by spreading the word about our expanding FRA badge program throughout each regional federation. To everyone reading this column: please have folks contact me directly to get info (phone 805-659-3577; E-mail jbraceth@roadrunner.com). If you haven’t done so already, please write an article in your regional federation and local club newsletters conveying info about the new FRA program. With these new badges, we’ll now be offering units on Rocks & Minerals, Earth Resources, Fossils, Lapidary Arts, Collecting, Showmanship, Communication, Field Trips, Leadership, Earth Processes, Earth in Space, Gold Panning & Prospecting, Gemstone Lore & Legend, Stone Tools & Art, and Rocking on the Computer. I ask everyone’s good will and help in spreading the word to get these activities into the hands of as many kids as possible within our local clubs and societies to help kids learn the science and craft of our hobby while, as always, having fun!
SOME LAST REFLECTIONS

by Dr. Robert Carlson, AFMS President

Since this is my last Message as AFMS President, I would first like to thank all of the Committee Chairpersons and the members of their Committees for an outstanding job. With your help, this past year has gone by quickly and smoothly.

Looking back over the year, I can say that it has not been plagued with problems. The problems have been minor, and were quickly solved. Rather, the past year has been blessed with fun and enjoyment. The only sad point is the loss of two persons who have been very active in the AFMS and their respective Federations: George Browne and Dixie Alf.

At this point, I have attended four Regional Shows: Eastern in West Palm Beach, Florida; California in Lancaster, California; Northwest in Butte, Montana; and Midwest in Houghton, Michigan. As this newsletter goes to press, I will be attending the South Central Show in Arlington, Texas; and when you read this, I will be attending the Eastern Show in Newark, New York. I saved the best for last, the AFMS show in Roswell, New Mexico.

Attending all of these shows has given me an insight into the differences between Regions, and I have some observations that may help you improve your shows.

The Eastern Show in West Palm Beach did not have a lot of exhibits, but they did have a lot of dealers. Some of the dealers had jewelry and gemstones that I have not seen outside of Tucson, Way above my price range. West Palm Beach is an affluent community, and those items must sell or the dealers wouldn’t pay for the table space to display them.

By contrast, the AFMS show in Roswell has been characterized in print as being a small show. It had a lot of exhibits (40 in Competition) but relatively few dealers. Roswell is a relatively small community whose show caters to the public, not the few affluent in town.

In California, the exhibits and demonstrations were held in one building, and the dealers were in another. The weather was hot and the breeze was strong. Both buildings were air conditioned, and as one person said to me: “These must be new facilities, because the air conditioning works”. The show was well attended. There were even tour busses in the parking lot during the show. This means that the advertising was effective.

At the Northwest Show in Butte, it was hot. The show location was large, air conditioned and had a good number of exhibits and a fairly large number of dealers. How were the dealers? Fran dropped a bundle.

In Houghton, the weather was somewhat cooler. The school where they held the show didn’t need air-conditioning. Houghton is a small college town. During the summer, there are only the permanent residents who are not on vacation. The show was appropriately small.

A common thread runs among these observations.

First assess your potential patrons. If you expect high rollers, plan accordingly. If you do not expect high rollers, do the same.

Second, advertise as much as your budget will allow and don’t spend a lot advertising to Rockhounds; they already know.

Third, you need to provide an atmosphere that is comfortable for the public. The advertising will bring in the public; the comfortable atmosphere will induce them to stay. When the public comes and stays, they have a tendency to shop and buy. When this happens, the dealers are happy and will support your next show.

Fairgrounds that have recently had animal shows, complete with flies, and have no air-conditioning are not comfortable to the public. That hasn’t happen this year, but I do remember a Federation show where Louie Redfern had an eight foot case of carvings and he complained so bitterly about the flies that we awarded him a special trophy for having the most flies in a single case. ‘Nuff said.

I have enjoyed my time in office. It has been a pleasure and privilege to serve you. My only request is that you treat the future AFMS Presidents with the same respect and affection that you have afforded me.

RLC
GREETINGS FROM YOUR PRESIDENT-ELECT

by Shirley Leeson

This month I'd like to mention a few words about someone who is the "glue" of the AFMS. He has made life easier for all the proceeding AFMS Presidents, officers and chairmen. This person is someone who has "been around" and is able to work miracles. If you're in a bind and need help, he's there. Unlike me, he's diplomatic.

This person has a huge background in education. He's the second member of the dynamic duo. He's been on the AFMS Blylow Advisory Committee for a number of years.

When the AFMS had the problem with Dan McClennen he was there to "fix the problem." It was during his term of office that Dan was summarily fired as AFMS Secretary and Central Office Administrator. Lewis Elrod stepped in as Central Office Administrator, but Dan was unable to continue because of eye problems. Once again, Steve Weinberger stepped in and took the position of Central Office Administrator and we've been fortunate to have him ever since.

The job isn't easy. It requires remembering dates and procedures. It means continually reminding Officers and Chairmen of important things coming up on the calendar. If you read your AFMS Bylaws and Operating Procedures you'll see that the job is complex and demanding. Nothing for the faint of heart.

Steve has been helpful and diplomatic in doing his duty and reminding you of yours. Ask any previous AFMS President and they'll tell you that Steve has been their backup.

Steve's background is in education, he was a teacher for many years in the Baltimore area. He's been a staunch member of the Gem Cutters Guild of Baltimore, holding most of the offices in the club. He's been through the chair of Eastern Federation and also through the chair of the AFMS, culminating in President in 2002. He's involved in Eastern's Wildacres and heads the Board for that program. He also teaches faclidging at Wildacres, usually in the fall.

He lives with another important person to the AFMS, Carolyn. She's the one who puts out the AFMS Newsletter each month and has been featured in this column. They live with two special "people." Their dogs, Barkley and Caesar think they are people and act accordingly. I remember once at Placerville when the Director's meeting was "going on" and all at once Barkley, who had been sleeping under Carolyn's chair jumped up and barked. It brought the room to attention!

We've been privileged to know both Carolyn and Steve for many years, going back to the 70's when Carolyn and I were club bulletin editors and corresponded frequently. Of course there wasn't instant messaging then, it took days to get letters back and forth across country. It's a rich experience and as I go into the AFMS Presidency in November, I can't think of anyone I'd like at my back than Steve and Carolyn. Perhaps they can keep me in check so I don't do something unacceptable. But that's a tall order for even them.

It's been fun this past year helping you learn more about some of the people who have made the AFMS what it is today. Next month I'll be stepping up to the Presidency and doing a much different column. Till then, thanks for listening.

Shirley Leeson
AFMS President-Elect
<shirleyleeson@msn.com> and
<beauholland@salmoninternet.com>
(Please send to both e-mail addresses)

Sir Barkley Bigfoot
“When I bark, people listen!”

Caesar the GoFer
“I was adopted”

Purpose of the AFMS:
To promote popular interest and education in the various Earth Sciences, and in particular the subjects of Geology, Mineralogy, Paleontology, Lapidary and related subjects, and to sponsor and provide means of coordinating the work and efforts of all persons and groups interested therein; to sponsor and encourage the formation and international development of Societies and Regional Federations and by and through such means to strive toward greater international goodwill and fellowship.

The AFMS Newsletter is published monthly except January, July and August by the American Federation of Mineralogical Societies

Address corrections and changes
Subscription Information
Distribution Questions
Each Regional Federation Club is entitled to receive three (3) copies of the AFMS Newsletter. These are sent to the President, Editor and Federation Director or Secretary.

Subscriptions are $4.50 per year
Remit payment to the AFMS Central Office
Checks should be made payable to "AFMS"

Address maintenance and mail listings are the responsibility of the AFMS Central Office.

All changes and questions should be sent to:

**Be Safe - Be Well**

*by Don Moore, AFMS Safety Chair*

**Sun Exposure - Changes Through Time**

A few things that we consider as safety issues have actually changed but not very many. Most hazards remain constant and are still bad for you but our attitude and our knowledge about sun exposure has really changed over time.

When I was young (no snide comments please) I remember the social implications of having a suntan. Men were regarded as "rednecks" if they had a tan face and hands but were whiter over the rest of their body. Women who had a tanned complexion were thought of as farm women or farm workers and were thought to be of a lower socio-economic class. Many of the girls from the "city" were extremely careful about exposure to sunlight.

All of these attitudes changed in the mid-1900's when it became stylish to have a "tan". The health effects of sun exposure and the positive aspects of Vitamin D created emphasis on the tanned appearance. Everyone wanted a "tan" and we all got one and tried to keep one.

Well, now we are paying for those tans as the pendulum swings back toward sun protection. I won't say that skin cancer is rampant but it is a very real concern particularly for the fair skinned. I have been told that sun damage is a cumulative thing and we do not want the kids to start too young.

Our knowledge about sun exposure has actually changed but not very many. Our attitude and our understanding of protection from the sun.

1. Visit a dermatologist on a regular basis, more often if you have a fair complexion.
2. Minimize your sun exposure. I simply am afraid to stay out in the sun because it is not worth the risk. Dress sensibly wearing hats, sun glasses, long sleeved shirts and light colored clothing outside.
3. Use an appropriate sun screen following your physician's advice.
4. Try to convince the younger generations that it is not "macho" to fry in the sun.
5. Don't forget the little children or grandchildren. I have been told that sun damage is a cumulative thing and we do not want the kids to start too young.

---

**What a Surprise!**

*by Marge Collins*

The distinction of receiving the AFMS Recognition Award is a most unexpected honor! Sharing this recognition with June Zeitner, Jim Hurlbut, Dee Holland and Glenn and Dorothy Lee leaves me almost speechless. Each has a substantial record of service for AFMS and our hobby.

It's been a genuine pleasure to chair Program Competition the past 12 years - thanks initially to the trust of Ruth Bailey. But without producers, who submit presentations, there would be no Competition, and nothing to give to the Regions. I encourage more amateur and professional producers to participate in this circle of sharing. And I thank my husband, Chuck - so many unforeseen adventures and friendships as a result of that first silversmithing class he enrolled us in 35 years ago!

Within another year or two, it will be the turn of someone else to take over the reins of Program Competition so the next generation can have a new crop of great programs for use at Club meetings, etc.

With sincere appreciation,

Marge Collins

**Swarf... and How to Tame It**

*from Gem Cutters News, Nov. 1984*

Swarf is that milky liquid you get when you cut cabochons or faceted stones. Although it appears to be harmless, swarf can be deadly to your plumbing system and lapidary equipment if not handled properly.

When you grind rocks to make cabochons or faceted stones, you’re removing tiny bits of the rock and carrying them away from your work with water. When the water evaporates, the tiny rock bits are left behind as a sort of concrete gunk. Over time, this gunk will harden like concrete.

So how do you tame the swarf? Never, never, ever dispose of your swarf in your plumbing system. Don’t pour it down a sink or toilet because eventually that gunk will harden and eventually narrow your pipes. Because it’s concrete-like when hardened, it will be almost impossible to remove! Instead, take your swarf outside to a non-important part of your garden and dump it there - or if there is no garden handy, allow the swarf to settle in the bottom of a bucket for a day or two, then carefully pour off the now clear water, and scoop out the swarf, put it in a plastic bag and toss it in the trash.
I've watched CSI: Crime Scene on television, you probably know the theme song is "Who Are You?" Since I'm new to most of you, that's a good question to ask me.

I wear a lot of different hats. I'm a rockhound by marriage (to Richard — really, I DO like fossils, sand, and thumbnail minerals), a teacher by choice, a mother to 3 grown sons, a novice yoga instructor, and a volunteer in several areas.

My background in editing includes doing the T-Town Rockhound for 9 years, entering (always) and winning (occasionally) the bulletin editors’ contests, being the RMFMS Club Publications Chair ("surprise, you're it!") the past 4 years, and writing/revising all those papers in college.

For me, life is an education, and I love it that way! There are so many interesting people and things in the world to explore.

Now — what about the AFMS Bulletin Editor's Contest? Since we are already most of the way through 2007, I don't think it would be fair to announce any drastic changes for the 2008 contest. And that does NOT mean there will be any drastic changes made. However, I think we do need to update some things to bring us into the 21st century.

So, I have some questions for everybody:

1 - Do you want to see any new contest categories added? Old categories dropped?

2 - What about club web sites? This is another means of communication with members.

3 - Is there anything else you want AFMS Club Publications to cover besides the bulletin contest?

4 - Are there any AFMS contest rules you would like to see changed or "tweaked"?

5 - What other ideas do you have?

Regional BEACs and any bulletin editor — please contact me with your ideas, suggestions, frustrations, etc. This is your chance for input. My e-mail address is: <LJGRALG@aol.com>. My telephone number is: 918-481-0249. We have an answering machine, so leave a message if you don't reach a live person!

Here are some clarifications for the 2008 contest:

1 - All AFMS guidelines, rules, and sample judging sheets will be available to everyone on the AFMS website as soon as I can get them typed and sent to the webmaster: (<www.amfed.org>.

2 - Cover pages — will NOT be counted as a "page" for determining what category a bulletin fits into UNLESS that cover page contains information that NOTICEABLY CHANGES EACH MONTH, such as a calendar or news items or officer reports, etc. If a page contains no information (other than a date/volume number) that changes each month (some bulletins have an "inside cover page" that contains only the club purpose, officers/committees lists, federation affiliations), then it does NOT count as a "page" for deciding the bulletin category it belongs to.

3 - A sheet of paper printed on front and back (with info that "changes" each month) counts as 2 pages.

4 - Bulletin Categories:
   - Mini Bulletins - 4 pages or less
   - Small Bulletins - 5 pages through 11 pages
   - Large Bulletins - 12 or more pages
   - New Editor - any size, First time editors only (and not "taking over" from a relative or becoming editor from assistant/co-editor)

5 - E-mail/electronically stored bulletins: For clubs that send bulletins by e-mail only and/or store bulletins electronically: submissions (hard copy) in color and printed on only 1 side WILL BE ACCEPTED. They will be judged without regard to the fact that they are in color or printed on only 1 side. These must be submitted exactly as they were e-mailed/sent to club members. (No Cheating!)

I would like to send revised (as needed) rules for the 2009 contest to BEACs and past them on the AFMS website by January of 2008. This means I need responses from YOU, ASAP!

Deadline for getting your input to me is December 1, 2007.

AFMS Newsletter - October, 2007
Overdue, we are proud to recognize our key member, and picking out their finds. John’s sluice continues to built an exceptionally fine two-level mineral sluice the course of several months last year. In addition and using his own tools, handouts, and equipment, visits to Wildacres, he took the challenge to go forth With private lessons under his belt and after a few manpower signed up and is Johnny-On-the-Spot with years he has been right there to get our member VP for EFMLS and our club’s Show Chairman. For a couple of terms each, he has served as Region III AFMS Club Rockhound of the Year.

I would like to nominate Ryan Shanks for AFMS Junior Rockhound of the Year. I have been a teacher for over 30 years and have rarely encountered anyone as enthusiastic for fossils as Ryan. I met him for the first time when he came to one of our meetings and asked me to identify a fossil that turned out to be a ground sloth claw. To me, this was very impressive that a 4th grader would have such a fossil in his collection and it told me that he had a true passion for paleontology. For his age, Ryan has an extensive knowledge and collection of fossils and he hopes to pursue a career in this area when he is older. Ryan joined the Central Iowa Mineral Society (CIMS) in the fall of 2005 with his parents. They have been very supportive of his passion and have provided him with many opportunities to pursue his interests. As a member of CIMS Ryan has participated in most of our field trips, such as Pella, Galena, La Grand quary, Hempstra quarry, and Vinton quarries. He has made some spectacular finds in these quarries that included bones and teeth of the oldest known tetrapods. He has attended all CIMS meetings and club activities since becoming a member. Ryan constructed fossil displays, for the Iowa State Historical Building in the spring of 2007. He also exhibited the displays when Dr. Jack Horner lectured and on Iowa Geology Day at the Historical Building. Ryan displayed and answered questions about displays at the Story County Conservation Spring Festival “Nature Rocks” in Ames, Iowa in 2007. Over the last two years he has presented research topics on fossils in his Science and Reading Research Language Arts classes. For the National History Day-Biography Research Night he made a display “Bernice H. Beane, World Renown Self-Taught Iowa Paleontologist.” For his work on these projects, Ryan was awarded 6th grade “Future Paleontologist” by his teachers.

Ad Hoc AFMS 60th Anniversary Planning
Shirley Leeson, Chair
<shirleyleeson@msn.com>
<beauholland@salmoninternet.com>
The National Rockhound and Lapidary Hall of Fame was founded in 1987 to recognize excellence in the earth sciences by inducting one or more persons each year in six categories: Education, Fossils, Lapidary, Metalcraft, Minerals, and Tribute (Deceased). At this time, we have 125 inductees representing 44 states. All of the inductees are experts in their fields. Many of them have published several books and most of them have been active in community service. The “Hall” is housed in Murdo, SD and is open to the public.

Notable past inductees include such luminaries as:
- Washington Roebilng — although best known as the designer of the Brooklyn Bridge, he had an extensive mineral collection that was donated to the Smithsonian Institution in Washington, DC.
- Joseph Lizardzo, collector of lapidary masterpieces and founder of the Lizardzo Museum outside Chicago, IL.
- Paul Desautels, former curator of the Mineral Section of the Smithsonian.

For a complete list of inductees, visit the Hall of Fame website (<www.rockhoundhalloffame.org>).

Selection for inclusion in the National Rockhound & Lapidary Hall of Fame is made by a “Board of Consultants” who review nominations received for individuals in six categories — Lapidary, Metalcraft, Fossils, Education, Minerals, and Tribute (Deceased). Anyone may make a nomination — the process is quite easy (see box below).

The 2007 inductees are as follows:

**Education** - Roger Clark
Roger has written and illustrated two books on Fairburn agates that have highlighted the geology of the Badlands and Black Hills. He is a popular speaker who regularly shares his love of rocks with local elementary school classes as well as adult groups. He was also involved with the Fairburn Agate section of the Johann Zenz book of agates.

**Fossils** - Ben Vrana
An avid field collector, Ben studies, prepares, and identifies his specimens. He eagerly shows his personal collection to students and continues to share with both adults and students the many interesting things he’s learned and found. One of his more important finds, a rare and well preserved Mesosaurus was donated to the South Dakota School of Mines.

**Lapidary** - Martin Hultquist, PhD.
His passion is making exquisite bowls from agate, quartz, jasper, and other jasper materials. Rather than purchase commercially available equipment, Martin designed and built the unique equipment that he uses, modifying things as he finds a better method of doing something. He has earned two AFMS National Trophies for his work and has taught many in his club how to make these unique lapidary items.

**Metalcraft** - Paul Cory and Sharon Bertch (tie)
Paul Cory was fascinated with opal and as a result developed skills that have led him to become a master of gemstone inlay. He’s learned the best ways to keep opal from breaking, crazing or losing polish and he’s learned how to set his beloved gems in high karat gold. He currently markets his inlaid jewelry through his company, Iteco.

Sharon Bertch excels in using designs to bring out the best in the stones she uses. Most of her jewelry is silver and is fabricated. Most of her motifs are based on nature and her interpretations are natural rather than stylized. Her jewelry is delicate, graceful and delightfully wearable. She has won a jewelry trophy from the Rocky Mountain Federation.

**Minerals** - Steve Weinberger
Steve’s interest is primarily in micro-minerals. He studies and photographs them and is organizer of the annual Atlantic Coast Micromount Conference held in the Washington, DC area. He won 2nd place in Jeff Scow’s Tucson photo contest two years in a row. In addition to his love of minerals, he teaches faceting both for his home club and at the EFMLS Wildacres Workshops held in Little Switzerland, NC.

**Tribute** - Robert “Bob” Lange
Bob became interested in carving at the age of five when he carved a wooden head. Later in life he became interested in rockhounding which led to his carving of gemstone materials. Recognized as a master of his craft, Bob was responsible for the founding of the Gem Carvers Guild of America and for teaching many others. He had numerous articles published in Lapidary-Journal, Rock & Gem, and Gems & Minerals magazines.

**HOW TO MAKE A NOMINATION**

1. List the name, address, phone number and e-mail of your nominee.
2. Select a category — Education, Fossils, Lapidary, Metalcraft, Minerals or Tribute (Deceased).
3. Include the name, address, phone number and e-mail of a contact person.
4. Tell why your nominee should be included in the National Rockhound & Lapidary Hall of Fame. Include as much information about the nominee as possible and the reasons they should be inducted. Remember the Board of Consultants may not know your nominee.
5. Mail your nomination to:
   Maxine Wilson, Curator, NRL Hall of Fame
   23530 263rd Av
   Murdo, SD 57559-6025
