

AFMS MINERAL COMPETITION LIST

DIVISION _____ CLASS _____ CASE NUMBER _____

This list, typed or printed, of specimens in your exhibit **MUST** be completed and given to the Exhibits or Judging Chairman **WHEN YOUR CASE IS READY TO BE JUDGED** or prior to the start of judging. Judging will begin at: Time _____ Day _____ If more than one specimen of a species is shown, please include locality or other distinguishing information. Specimens should be numbered left to right, from back to front; if desired, a map of the case (showing the numerical position of each specimen) can be attached to this sheet to help the judges locate the specimen. The exhibit will **NOT** be judged without this form!

09/13/2009

1. Add up the quality score given by each judge, so you end with two or three totals.
2. Average those totals, that is, add them, then divide by the number of judges.
3. Divide that average by the number of specimens in the case.
4. Divide that result by the highest possible score for a single specimen, usually either 10 or 100.
5. Multiply that by the quality points available (presently 70). That is the number you want.
6. Have a second person do the same procedure to confirm the result.
