THE SOUTHEAST FEDERATION OF
MINERALOGICAL SOCIETIES, INC.
A Non-Profit, Non-Commercial, Non-Political Organization and
Regional Federation of the American Federation of Mineralogical Societies

PURPOSE:
To bring about a closer association of Clubs and Societies devoted to the study of Earth
Sciences and the practice of Lapidary Arts and Crafts in the Southeast part of the United
States.

OBJECTIVE:
To cooperate with similar Federations to promote public interest in the Earth Sciences and
the conservation of natural resources.

2013 AFMS/SFMS Annual Meeting News

Be sure to check the AFMS or SFMS websites for the annual meeting itinerary. You will also find information of special hotel accommodations and applications for the banquet and competitive and non-competitive display cases. Visit the following website: http://jaxgemandmineral.org/2013AFMSMeetingSchedule.html

JGMS and NEFAS are happy to announce a special opportunity for all visitors and attendees to the 2013 AFMS/SFMS annual meetings. The host club, Jacksonville Gem and Mineral Society in collaboration with the North East Florida Astronomical Society are hosting a special picnic and star gazing party Thursday September 19, 2013 from 5 pm until late at Hanna Park (Premier Jacksonville Beach Park). NEFAS will have many telescopes set up for the star gazing event. The prominent event will be viewing Saturn at one of its closest proximities to earth in 300 years. It should be spectacular viewing. JGMS will be cooking and supplying free food and drinks for the event (donations will be accepted). A special note: To join in on the fun, you must be in the park before it closes at 6 pm to incoming guests. Guests will have to pay the entry fee for the park, $5 or less depending on the number of occupants per vehicle. Once you are in the park, you can leave at any time after that, but no reentry unless you are comping at the park. For more information and directions to Hanna Park, see the website: http://www.coj.net/departments/recreation-and-community-services/recreation-and-community-programming/hanna-park.aspx

Be sure to catch the special lectures at the JGMS Annual Show. We are pleased to announce Dr. Rhiannon Mayne, curator of the Monning Meteorite Collection and Assistant Professor of Meteoritics and Planetary Science at Texas Christian University, and Dr. Mike Reynolds former space shuttle school teacher alternate and Smithsonian meteorite curator will be giving special lectures during the JGMS Show on meteorites and our solar system. The final date and times have not been set yet, so check the JGMS Show website in the coming weeks for the updated information. The show will also have on display one of the famed NASA moon rocks.

Want to get in some lapidary class time in conjunction with the AFMS/SFMS Annual meeting? The SFMS has created a special opportunity for anyone attending the
AFMS/SFMS meetings to attend the SFMS Federation Education Week at the Wildacres Retreat in the mountains of North Carolina September 23-29, 2013. Wildacres will be transformed from a serene retreat into a lapidary school. There will be weeklong lapidary training in Advanced Fused Glass, Cabochons, Casting, Exhibiting & Judging, Intermediate Silversmithing, Kumihimo, Faceting/Open Studio, Resin 101, Silver Cold Connections and Intermediate Wire Wrapping. Plan your visit accordingly so that you can attend this special week at Wildacres. It will be an awesome end to attending the AFMS/SFMS annual meetings. For applications and more information please visit:  
http://wwwsfmsworkshops.com

Nominations Committee Report

Jason Hamilton

Per SFMS By-laws, Section IX, Section 6G, the Nominations Committee recommends the following official slate of nominees for election at the SFMS Annual Meeting to be held in Jacksonville, Florida on September 21, 2013:

President (one year term)  James Darnell
1st Vice President (one year term)  Dave Wayment
2nd Vice President (one year term)  Lisa Roberts
Treasurer (two year term)  Mari Webb
Membership Secretary(one year term)  Jason Hamilton
AFMS 4th Vice President  Ann Monroe

August 2013 Presidents Message

Danny A. Griffin, SFMS President

As the AFMS/SFMS Annual Meeting approaches I can’t help but think how fast this year has flown by. It seems like yesterday that this convention was ages away. I hope many of you have planned on attending. It has been well planned and I expect it to be an amazing event. The theme for the Annual Meeting and Jacksonville Gem and Mineral Societies gem show is “Heavens and Earth”. There are many excellent speakers lined up and I expect to hear several informative meteorite and fossil lectures. There will be meteorite displays from Texas Christian Universities Monning Meteorite Collection and a moon rock on loan from NASA.

As I stated last month, I will have the opportunity to publicly announce, at the AFMS meeting, the names of any SFMS member who has passed away since the last AFMS meeting (2012). If you have a club member whose name you would like for me to announce please e-mail their name, associated club, and any pertinent info to me at gcjinc@comcast.net.
I have heard from several clubs about successful field trips and I'm pleased to announce that they have been safely planned and attended. Safety must always be the highest priority during field trips and in any workshop setting. Any time a field trip is over and there have been no injuries I consider it a complete success. This same philosophy applies to club workshop attendance. Any time that a member can spend a day at their clubs workshop and can return home uninjured, it's been a good day.

Also, remember the SFMS Workshops are on going, with classes still available. I plan on attending the September Wildacres session with my family. We are all looking forward to the classes and reconnecting with old friends.

I hope to see many of you at the AFMS/SFMS Annual Convention or the Wildacres Workshop. Be Safe!

**New State Directors (Alabama, Georgia, Mississippi)**

David Wayment, SFMS 2nd Vice President

I am pleased to announce the election of State Directors for Alabama, Georgia and Mississippi. The voting for a new State Director is currently in progress for Tennessee. We still need to locate a State Director for Virginia.

Philip W. Kaiser, Jr. is the newly elected State Director for Alabama. His home club is the Mobile Rock and Gem Society. Philip is a past President of the Mobile Rock and Gem Society. He currently is a board member. He has been Show Chairman. He is also the scholarship liaison for the MRGS. He has attended SFMS workshops at both William Holland and Wildacres. Philip is looking forward to working with all the member clubs and societies in Alabama.

Georgia has elected Scott Forward as their State Director. He is a member of the Augusta Gem and Mineral Society. He is also a member of Kingsport Gems & Minerals Society and working with developing a new club in Cherokee County. Scott is looking forward to working with the different clubs/societies in Georgia.

Dave Hanes has been elected by Mississippi as their new State Director. His home club is the North Mississippi Gem and Mineral Society. He has represented the club at SFMS meetings and is looking forward to becoming involved with the other clubs in the state as the State Director.

**Allergies**

– Bob Green, Safety Committee Chairperson
This month we are going to talk about personal health. The topic is the allergies and specifically those that can lead to significant health issues.

I read an article about a young lady, thirteen years of age that passed away at a summer camp, because she had a significant allergy to peanuts. The article stated that she was eating a “rice crispsies” treat and told her mother that it tasted like peanut butter. She apparently stopped eating the treat and about 15 minutes later went into anaphylactic shock. Her father, a physician was present and administered three Epi-Pens that are designed to provide immediate relief to these types of episodes, however, she went into a coma and did not survive.

The statistics provided with this article stated that between 1997 and 2011, the number of children suffering from food allergies increased by 50%. Those suffering from peanut allergies tripled during the same time frame. The article went on to state that the prevailing thought was that this was genetic and environmental.

In a time and space a long, long time ago, I knew two folks that had severe seafood allergies. One was so severe that she had been to the emergency room more than three times when she accidentally consumed a sauce that contained shrimp. The last time she was told by the ER doctor that if she had not gotten to the ER when she did, she may not have survived.

Now, many of us in the south have allergies. Our home town of Greenville, SC was designated as the worst place for allergies in the year 2010. The seasonal allergies here are the result of a wide variety of trees, grasses and molds. My wife unfortunately has allergies of foods. One of the most unusual is watermelon. She develops hives if and when she eats watermelon, so she has deleted these from her diet. She has also dropped wheat from her diet, and joined the gluten free group.

Fortunately her allergies and mine are usually just annoying, until they start impacting our breathing. As noted in several articles, the increase in persons suffering from asthma is dramatically increasing. Asthma is not to be taken lightly. It also can be a killer. My wife developed asthma several years ago and I developed asthma approximately two years ago and fortunately this seems to be under control most of the time. We have known several folks that trips to the emergency room to restore adequate breathing are regular occurrences.

For a long time, I thought that my nose was allergic to my upper lip and considered that the way of life. My wife convinced me to visit the allergy doctor which I did about a year ago. My life has been better since then. I know that my upper lip is not the issue; however, my mouth has gotten me into trouble before, but not with allergies.

It is very important as the little ones grow up that they are monitored to ensure the allergies if any are identified. I think the standard view is to be very careful until the child is old enough to tell the parent if something does not feel right.
So, with that cherry note, be safe and listen to your spouse or significant other, if they insist that you need to do something to improve your health.

**SFMS WORKSHOPS UPDATE**

Roy Deere, Education Committee Chair

As we announced last month our August workshop at Wildacres were full and had a waiting list. I just got a call from the Wildacres people telling me that the other group which we are sharing the facility with returned some of their rooms to them and they can now provide us with some additional rooms. If you are interested in an August class at Wildacres please call the Wildacres Registrar (B.J. Gearhart at 770-479-0963). I realize that is short notice; but it provides a chance for you to take a class that would otherwise be closed. The following classes have openings at Wildacres in August.

**Chain-Maille:** This class is open to beginners thru advanced. Projects will be based upon your level of experience. Students will learn to cut their own Jump Rings and to assemble several different kinds of weaves. Advanced students will learn many different enhancement techniques to incorporate into their chains.

**Beginning Silversmithing:** Explore the art of jewelry fabrication. Students will learn cutting and piercing with the jeweler’s saw, soldering with Acetylene gas, stone setting, and finishing/polishing through demonstrations and hands-on work. Projects may include rings, bracelets, pendants, and/or earrings.

**Beginning Wirecraft:** Using pliers, gold-filled or sterling silver wire, assorted beads and gemstones, and a few basic techniques, learn how to create your own fashion jewelry. Designed for beginners, specific projects have been selected to allow participants to acquire or reinforce the basic skills needed to make simple rings, bracelets and pendants and then apply those skills to more complex designs. Skills will include selection, measurement, cutting twisting, assembling, binding, and shaping of wire, use of beads and gemstones, and decorative finishing of pieces.

**Chasing & Repoussé:** Our class features step-by-step instructions that introduce and reinforce the basic techniques of moving metal in this ancient art form in which a flat sheet of metal affixed to pitch in a bowl is manipulated using punches and hammers to impart a three-dimensional pattern and/or shape. We work on jewelry scale projects that enable students to complete several finished pieces during the week. Surface and background textures will be demonstrated as well as ways to patina and color the metal of the finished jewelry.

**Polymer Clay:** This will include some basic canes, skinner blends, bead making and finishing techniques. Making cabochons, bails and polymer clay bezels. Using a unique rubber stamping surface technique then making tiles for a bracelet. A watercolor painting collage techniques on clay using alcohol inks, cutters and word stamps to make pendants.
By week's end students will have a completed bracelet and 2 pendants.

**Seed Beading:** In this class you will learn how to do basic seed bead stitches like peyote, herringbone, right angle weave, brick stitch, fringe, and bead embroidery. You will learn what kinds of thread to use with different kinds of beads and stitches. We will also cover how to make a beaded bezel for cabochons to hang from beaded necklaces or turn into brooches.

**Scrimshaw:** Scrimshaw is an art form that was first popularized by American whalers. The designs are scratched through the polished or sealed surfaces of materials such as ivory. Pigments are then applied. Scrimshaw is used in jewelry, knife handles, and powder horns. This is an economical course in scrimshaw. We will focus on how to prepare and use low cost, easily available scrimshaw blanks, such as bone, horn, Tagua nuts, shell, mother of pearl, and old piano keys. No whales will be harpooned for this course.

See the website [www.sfmsworkshops.com](http://www.sfmsworkshops.com) for details and pictures of items from the classes.

Due to the distribution of students in classes we are cancelling some classes at the September Wildacres session. The following classes are being cancelled for September: Advanced Fused Glass, Cabochons, and Faceting/Open Workshop. Please look over the remaining classes and if you want to attend a class in September send your registration in now! I fully expect that we will have a waiting list for September soon. It is important that you get your registrations in soon for these classes.

Our September session at Wildacres is just around the corner. We have a limited number of rooms for this session so it is important for you to get your reservation in now to insure that you get your class. The classes for September are:

**Casting:** The emphasis will be on production centrifugal casting, meaning techniques for high reliability. The class will teach centrifugal & vacuum casting, wax modeling, sprueing, investing, burnout, casting, finishing and polishing, rubber mold making and wax injection. Students will learn to make cast silver embellishments for their silversmith pieces.

**Exhibiting & Judging:** This is a class in Exhibiting and Judging for Competitive Exhibits. The class will teach you the detailed rules for all kinds of competitive cases, how they are scored, and how to exhibit your own case. It will cover all of the different areas of our hobby such as: Beads, Minerals, Lapidary, Jewelry and Art Metalcraft.

**Intermediate Silversmithing:** Explore the art of jewelry fabrication. Students will learn cutting and piercing with the jeweler’s saw, soldering with Acetylene gas, stone setting, and finishing/polishing through demonstrations and hands-on work. Projects may include rings, bracelets, pendants, and/or earrings.

**Kumihimo:** Kumihimo is a Japanese form of braid making. Kumihimo cords were used by Samurais to lace their armors and their horse’s armors. Actually Kumihimo cords are used as ties in jackets and on kimono sash. Kumihimo is a technique that is easy to learn. During the week class you will learn to make beautiful necklaces, bracelets, and earrings using different
sizes and colors of cords braiding strings and beads.

**Resin:** Explore the endless possibilities resin has to offer when making and designing jewelry. Students will learn the basic techniques needed to work with resin including mixing, pouring, curing, and adding color. This hands-on class will cover creating and filling hollow bezels, adding inclusions, using resin on paper, making molds and casting charms. Finishing techniques will also be demonstrated. Various tips and tricks for working with resin will take the mystery out of the process to make it fun and easy.

**Silver Cold Connection:** Creating Metal Jewelry With Out Soldering. Silver will be the metal of focus although we will use bronze, brass and copper as well. We will focus on simple metal forming, texturing, cold connecting, etching your own personal texturing plate, patination, the art of producing a professional finish on your jewelry, and the use of a variety of tools. In past workshops, students have turned out amazingly beautiful & creative work in this class.

**Intermediate Wire Wrapping:** This class will focus on the individual who wishes to take their basic wire wrapping skills to the next level. Projects include pronged rings and pendants using faceted stones, and other intermediate/advanced projects. Bring your own imagination, ideas and projects you would like to make and look forward to your completed wire creations.

I encourage you to mark one of the remaining workshop dates on your calendars and plan on joining us for a wonderful jewelry vacation at our enjoyable locations. See you there soon.

**Benjamin Boren – Western South Carolina Gem and Mineral Society, Inc., Greenville, SC**

Mr. Benjamin Garnett "Ben" Boren, 80, husband of Marilyn Harden Boren, passed away Monday, August 5, 2013 at his home.

Born in Cateechee, SC, a son of the late Deles and Annie Nicholson Boren, Mr. Boren started his career as a South Carolina Highway Patrolman and later went to work with State Farm Insurance, where he retired with over thirty years of service. He was of the Methodist faith and was a US Navy veteran, having served in the Korean War. Ben was past president of the Western South Carolina Gem and Mineral Society.

Surviving, in addition to his wife of fifty-nine years, are a son, Ben Boren of Charlotte, NC; a step-brother, William Jerry Gibson of Easley; and two grandchildren, Eric and Emily Boren. In addition to his parents, Mr. Boren was predeceased by two brothers, Deles Woodrow Boren, and Edward Boren. Ben was the last surviving member of his immediate family.

The family would like to express their gratitude to Terry Hendricks, Patty Powell, Carol
Brezeale, and Brandy Cheeks for the love and care they provided to Mr. Boren.

Memorials may be made to Providence Care Hospice, 202 Wall Street, Piedmont, SC 29673, or to the Alzheimer's Association, 301 University Ridge, Suite 5000, Greenville, SC 29601.

Condolences may be expressed online at www.robinsonfuneralhomes.com or in person at Robinson Funeral Home-Downtown, which is assisting the family.

**SFMS Slide and Video Programs Updates**

Freda Hall

Thanks to the Western SC Gem & Mineral Society we have several new DVDs of the lectures given to their club by Rudy Mancke for our Programs Library.

Here is the letter that came with the programs.

Every other year, Rudy Mancke does a program for our club, Western SC G&M Society. With his permission, we have been videotaping it. This year, he gave us permission to donate the programs to the SFMS Library for use by other clubs. We hope other clubs enjoy his talks as much as we have.

Below is a short bio for those who may not know him from PBS’s Nature Scene.

Rudy Mancke grew up in Spartanburg, SC, and spent his childhood roaming the woods and meadows of the Piedmont, observing the natural world, identifying flora and fauna, and asking himself questions about what he saw. When he was not exploring the outdoors, he was in the library seeking answers to these questions while forming new ones.

Rudy's education at Wofford College and graduate study at the University of South Carolina broadened his interest in natural history, an enthusiasm that he tried to give to his students at Spartanburg High School and later to the public while a Curator of Natural History at the South Carolina State Museum.

Rudy is happy to have founded the South Carolina Association of Naturalists, an organization that continues to thrive. Rudy's work at the museum brought him into contact with producers at South Carolina Educational Television and led to the television series *Nature Scene* (1978-2002) that is still being aired on public television. With hosts Beryl Dakers and later Jim Welch, Rudy led viewers on nature walks in many locations in the United States as well as to sites abroad.

The lectures are from 2004, 2006, 2010 and 2012. They have been cataloged and will be posted on the SFMS Programs list on the SFMS website.
**Lost Treasures in Western North Carolina**

By Fred Plesner, Archivist for the Gem & Mineral Society of Franklin

Last year while I was talking to Gordon Mercer in regards to an upcoming radio program I was asked if I cared to comment on any stories about lost treasure in Western North Carolina. I declined because I simply was not qualified to discuss such matters. However, I recently read a story in a new book that just delighted me called *Mines Miners and Minerals of Western North Carolina* (2005) by Lowell Presnell. I give it a thumbs up.

Here is the story as reconstructed from his book.

In 1923, a young geologist by the name of Dan Adams was contracted to purchase mineral-rich lands for an investment company by the name of Crabtree Holdings, Inc. Dan Adams in turn hired a fellow by the name of Carter Hudgins to drive him around. They located a parcel of land that was near the headwaters of Crabtree Creek and placed it on their list. That parcel of land was to become Old # 20 Mine.

That piece of property was owned by a fellow by the name of Joe Ballew. Joe Ballew did not trust people and would associate with others only if he had to. Young Dan Adams however managed to contact him and had several meetings with him before a deal was struck. The price was set at $1,500 with a catch. Old Joe Ballew would accept nothing but gold coin so special arrangements would have to be made. Arrangements were made with a bank in Knoxville, Tennessee for delivery to be made in $20 gold pieces. Old Joe could neither read nor write and the only person that he trusted was the postmaster at Little Switzerland.

In due time all the necessary arrangements came together. Dan Adams, Carter Hudgins carrying a leather pouch with the money and the postmaster drove their car to where the road ended, parked the car and started down a path to an agreed upon clearing where everything would be signed and delivered. As they proceeded down the path they ran headlong into a hornets’ nest. In all the excitement, pain, slapping and suffering the gold was jettisoned. After a considerable delay, hornets had to be beat off, the money found and composure regained they continued on their way. Their concern was that Joe Ballew, who was known to be skittish, wouldn't be at the appointed place when they arrived.

Joe Ballew was waiting patiently for them and in due time the postmaster counted out the money and Joe made his mark. Joe then tied the ends of his old coat sleeves; put the money in and carrying his heavy load set out for his cabin, staying well away from the trail.

No trace of that gold has ever been found. The government recalled all the gold coinage in 1933 but there is no record of Joe turning in any of his gold and there is considerable doubt that Joe would have.

Someone paid Dr. Mc Bee of Marion with a $20 gold piece. Was it Joe Ballew or someone else? No one knows although many think so. After Joe died his property and the grounds around it were searched by many and nothing has been found.
Was the money converted to paper currency? Did someone find his money and say nothing? Did Joe bury it or hid it in some stump or hollow? Does it exist at all? All questions waiting for an answer.

**Gem and Mineral Shows**

**October 4-6, 2013 Dallas NC**

35th Annual Gaston Gem, Mineral & Faceters Club Show. Hours: Friday and Saturday 9am to 6pm; Sunday 9am to 5pm. Gaston County Park, Hwy 279, Dallas Cherryville Hwy, Dallas, NC. Just ½ mile off route 321. FREE ADMITTANCE... Minerals and fossils from around the world, cutting material, quality gemstones, wire wrapping, settings, geodes, jewelry. A real working SLUICE with all kinds of goodies. Hourly raffles for prizes.

**October 5-6, 2013 Lexington, KY**

23rd Annual Gem, Mineral and Jewelry Show – Rockhounds of Central Kentucky. KY National Guard Armory, 4301 Airport Road, Lexington, KY. Hours: Saturday 10am to 6pm; Sunday Noon to 5pm. Minerals, jewelry, equipment dealers, club sales, exhibits, KY Agate, hourly prizes, and Grand Prize drawing. Admission: $2 Adults, $1 Children; $5 maximum Family, Scouts in uniform FREE. Showchair Allen Ferrel kyrock2010kentucky@yahoo.com (859) 277-2469

color website: [www.lexingtonrockclub.com](http://www.lexingtonrockclub.com)

**October 19-20, 2013, Tampa Bay, FL**

54th Annual Gem/Mineral/Jewelery Show and Sale

**Sponsor:** Tampa Bay Mineral and Science Club

**Dates/Time:** Saturday, October 19, 2013, 10:am – 5:00 pm  
Sunday, October 20, 2013, 10am – 4:00 pm

**Location:** Strawberry Festival Expo Building, 2301 W. Oak Avenue, Plant City, Florida

**Admission:** Adults $5.00; Children 12 to 16 and Students with ID $4.00;  
Children under 12 free (with parent)

We will have over 40 vendors offering gems, minerals, beads, fossils, tools, lapidary material, jewelry making supplies, jewelry and much more. There will be live demonstrations throughout the show and hourly Door Prize drawings. We'll also have a silent auction, touch table, grab bags and magazine sales. Parking is free. January 10-12, 2014 Largo, FL
The Pinellas Geological Society, Inc. announces our Thirty Eighth Annual Gem, Jewelry and Mineral Show and Sale. Friday and Saturday 10 AM to 6 PM; Sunday Noon to 5 PM at the Largo Cultural Center, Parkside Room, 105 Central Park Drive, Largo, FL. Free Admission, Donation $1.50 for drawing.
Unique jewelry has fascinated mankind since cave days. Today that still holds true as men and women create wonderful gem and mineral ornaments from nature's abundant rocks and minerals. Members of the Gem and Mineral Clubs in our area gather together monthly to share their hobby.

The members of the Pineallas Geological Society and other local Gem and Mineral Clubs will be showing their cut gems, silver and gold jewelry, wire wrap, beading, cabochons, and collections of rocks and minerals for your viewing pleasure and purchase. The show is for the public of all ages who are fascinated by and enjoy seeing and learning about nature's beauty in gems, rocks and minerals. For more information about the show or joining the club, call Leona at (727) 894-2440.

Contact Person: Leona Sheffield, Co-Chairperson; 2440 Southshore Dr., SE; St. Petersburg, FL 33705
